
WEB DEVELOPER / GRADUATE WEB DEVELOPER

JOB DESCRIPTION

The web developer works as part of a wider development team building high-quality, reliable and user-friendly websites. Most of our website projects involve integration with open source content management systems, but we also develop e-commerce sites (mainly in Shopify), and static websites where appropriate. The web developer works along with the project manager, designer, and client to ensure the smooth and time-efficient creation and delivery of websites.

Main Responsibilities:

The main duties may include, but are not limited to:

- Building high quality, reliable and user-friendly websites integrated with open source content management systems
- Working in partnership with website designers to create great user experiences
- Testing and optimising code
- Identifying and rectifying website errors
- Maintaining existing websites
- Server maintenance and management
- Assistance with domain name and email account management
- Communicating within the team and with clients as required
- Staying up to date with advancements in web development
- Working with confidential data, in line with GDPR
- Other relevant tasks in keeping with the nature of the company's typical work
